REMARKS.—The market closes with a somewhat better feeling. In Flour we have had but little change to note during the week, the market being weil supplied, but the transactions limited to the city trade. Wheat has improved in price, but the receipts have fallen off considerably. The offerings to-day were 125 bushels white and 1000 bushels red; the former sold at 225 and 245, and the latter at 175 to 225 for very poor, and 227, 228, 230, 238, 240 and 245 for fair to good. In Corn there has been a steady improvement, and to-day the sales were at 118a180 for mixed, and 130 for yellow; offerings small. Oats have advanced, and prices closed at 70a72. Rye steady; 148 bid, 150 asked. Sales of Rye! quiet and prices unchanged. Butter very firm, and prime much wanted. Bacon quiet. Eggs advanced. Irish Potatoes in good supply. Lard quiet Seeds moderately active. BALTIMORE CATTLE MARKET, Oct. 15-Beef

The gold market at New York yesterday was again excited, and the price rose from 1372 to to 138. This rise, it is said, is caused chiefly by a disposition on the part of some of the bears to approach of exchange to the shipping point.

Soluble Phosphates, 39 ver cent Bone Phosphates, and animal matter yielding 4 per cent, of Ammonia-being identical in composition, solubility, and availability to crops with the best mixture that can be made of one part Peruvian and three parts Flour of Bone, treated with sulphuric acid. The Mapes' Super-Phosphate of Lime Company, being engaged in the manufacture of fien oil, are enabled not only to obtain large supplies of animal Ammeniacal material from the 1sh at low cost, but also to avail themselves of the economical process of fermentation, by the combination of the fresh animal matter with the Bones and Bird Quano, previously treated with acid, in reducing their fertilizer to soluble form, and are thereby able to furnish a quickly-acting Soluble Ammonisted Super-Phosphate at no higher rates than charged for ordinary Super-Phosphates containing a large amount of insolu-
